circle**

We're Solving Something Big.

India has the world's fastest growing young population. We also house the world's largest proportion of impoverished citizens.

Our country is currently staring at a consequential moment in history: where we go from here, and how we tap into the potential of this unprecedented mass of young people, will determine our future for centuries to come. The future of India cannot be fueled by a minority of its population.

Our educational system, above all else, must lean into this moment. We must prepare India's children, the vast majority of whom are simultaneously grappling with the debilitating effects of poverty, for a 21st century world that is rapidly changing and evolving. Unfortunately, right now, that system is failing. Our children – India's future – are stuck in schools that were designed for a 1950's world.

Have you ever thought of building your dream school or after-school center?

Do you have the courage and vision to reinvent India's educational system?

What we do

At The Circle, we're launching a two-year, fully paid, incubation program for entrepreneurs with the commitment and courage to redesign and launch innovative learning experiences for India's children.

What you get

Through intensive support and a peer community, the incubation will equip entrepreneurs with the knowledge and skills to :

1.

Design an innovative school or learning center

2.

Start and successfully launch a school or learning center

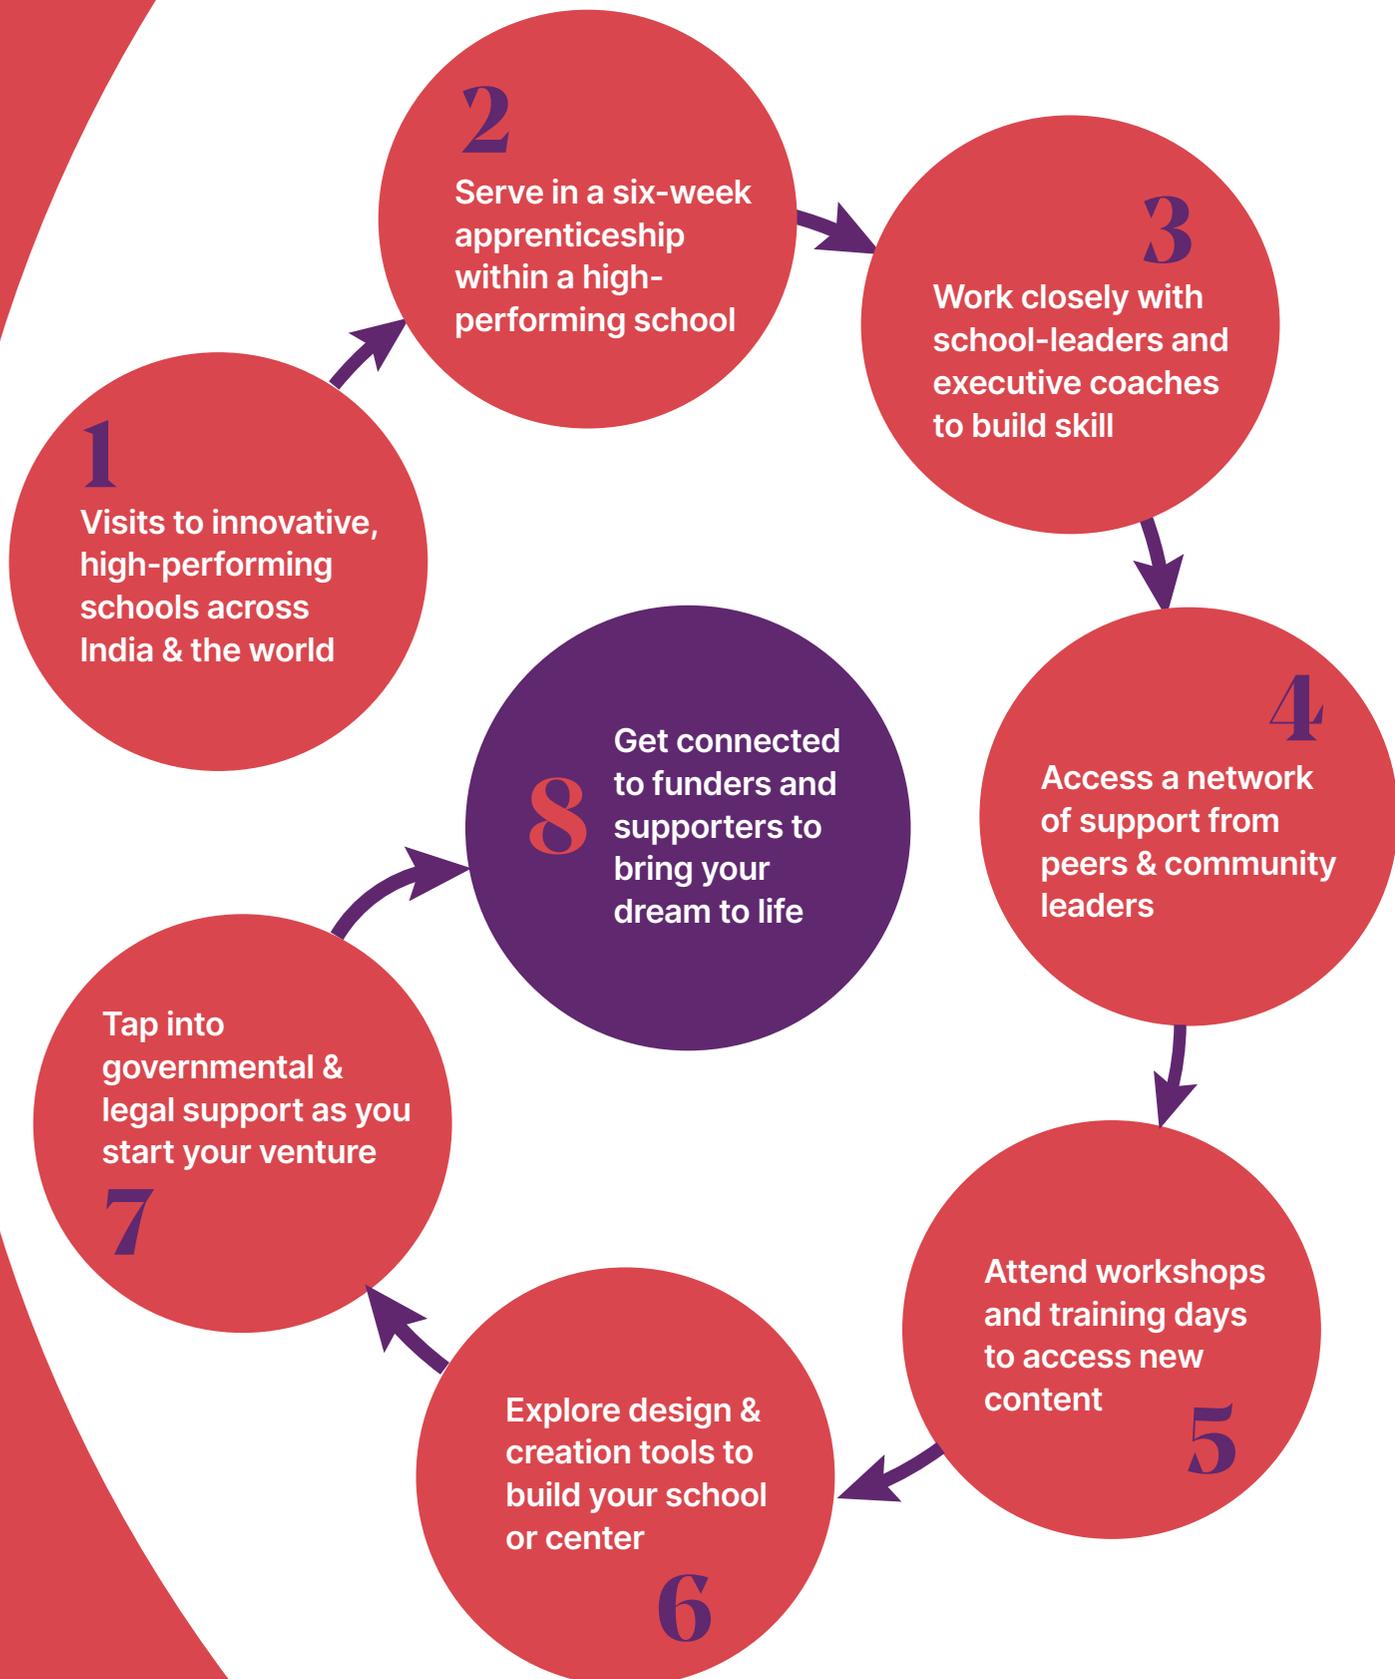

3.

Run and sustain a high performing school or learning center

The Journey of an Incubated Entrepreneur

Over the course of a two-year journey, incubated entrepreneurs will work with experienced coaches and facilitators from across the world to access a suite of learning experiences:

Getting a Lifetime of Support

What does it mean to be a part of The Circle for a lifetime?

- 1** Join a growing community of entrepreneurs and peers who are committed to changing the world
- 2** Attend conferences, events, and virtual professional development experiences
- 3** Send your school's children to shared conferences and events
- 4** Access curricular tools and resources intended to help improve and grow your venture
- 5** Work with coaches and experts who are committed not only to your school's effectiveness but also your personal development

Our Partners

We're working with a diverse set of partners, across continents, to build a robust and effective support ecosystem for entrepreneurs across the country:

Kids Education Revolution

Rob Strain Consulting

Teach For India

The Reinvention Lab

Transcend Education

Tropic Design

Riverside Schools

Who Are We Looking For?

We don't have a typical, neatly fitted, profile of an entrepreneur. You could be a current educator who wants to start a school. Or maybe you're working in India's corporate world, and you aspire to change India's educational system.

We are, however, looking for people who demonstrate key leadership characteristics that we believe are critical for success. Do you have a vision of excellence for a holistic game-changing educational experience? Are you committed to equity for India's underserved? Do you have the desire and capability to creatively solve complex problems?

An overview of the Incubation Selection Process:

Our Selection Processes for this year's Incubation, which will start on August 1st, will consist of the following five steps:

- Written Application
- Aptitude Assessment
- Phone Conversation
- In-Person Two Day Assessment Center
- Reference Checks

Our intention is to ensure that each stage of the selection process is an opportunity to get to know you, and better understand both your conviction for reinvention and your fit within the incubation.

Interested in Joining the Incubation?

We're launching our first cohort this October.

Visit us at www.thecircleindia.org or write to us at info@thecircleindia.org. Let us know if you're interested. And we'll set up some time to chat and walk you through the application process.
